Q2. What chemical changes? (1 marks)

- a) thermal expansion of materials
- b) permanent changes where new substances are formed with different properties
- c) mechanical processes involving force
- d) physical changes that alter appearance only

Q3. What chemical changes? (1 marks)

- a) physical changes that alter appearance only
- b) thermal expansion of materials
- c) mechanical processes involving force
- d) permanent changes where new substances are formed with different properties

Q4. What chemical changes? (1 marks)

- a) mechanical processes involving force
- b) thermal expansion of materials
- c) permanent changes where new substances are formed with different properties
- d) physical changes that alter appearance only

Q5. What chemical changes? (1 marks)

- a) permanent changes where new substances are formed with different properties
- b) mechanical processes involving force
- c) physical changes that alter appearance only
- d) thermal expansion of materials

SECTION 2: SHORT ANSWER

Q6. Explain: These changes can be classified as physical or chemical chan... (3 marks)

Q7. Explain: These changes can be classified as physical or chemical chan... (3 marks)

SECTION 3: LONG ANSWER

Q8. Write a detailed note on Physical changes. Include its definition, characteristics, and examples. (5 marks)

Q9. Write a detailed note on Physical changes. Include its definition, characteristics, and examples. (5 marks)
